

## Where do I go?

**CORN MAZE CONNECTION:**  
Seeing is believing. The MAiZE offers the perfect chance for students to see, touch, and feel corn in an actual field. That's an eye-opening experience for those who have not grown up around agriculture.

Label the parts of the corn plant from the list below. Did you know a corn plant has so much to it?

**ear or cob:** protected by a husk of tightly wrapped leaves

**kernels:** the plant's seeds and the part you eat

**roots:** these go deep into the soil and take out the food and water the plant needs to grow

**silk:** long soft threads at the top of the corn plant

**stalk:** some kinds of corn have stalks as high as 31 feet

**tassel:** the flower at the top of the plant

**Answers:** tassel, stalk, silk, ear or cob, kernels, silk, roots

Information was gathered with help from Utah's "Ag-in-the-Classroom" program. For more information see [www.ext.usu.edu/aitc](http://www.ext.usu.edu/aitc)
